Ministry of International Trade and Industry

Ministry of Natural Resource and Environment

Department of Occupational Safety Health

Department of Environment

Small and Medium Industries Development Corporation

MESSAGE FROM CICM CHAIRMAN

In an age where the fast pace of modernity have often taken centre stage, our endeavours to listen to our environmental consciousness remains strong. As a Council, we have developed and adopted various initiatives to ensure the balance between progressive science and environmental protection. The launch of the new Responsible Care Global Charter last year provided all member nations with a foundation of understanding of the necessities required to sustain and maintain the richness of our environment.

This year, we have a set a theme of 'Responsible Care: A New Focus' to further search, explore and discuss ways to enhance our industries efforts to deliver affirmative green action. The conference will also be an important avenue for the sharing of ideas and discussion of today's challenges between our members from across world.

We welcome all delegates from across the shores to the 10th APRCC and 35th ACIC. This year has particular importance as we celebrate the 50th year of our nationhood. As we move forward as a nation, so to do our industries.

CICM Chairman
Datuk Ir. Mohamed Al Amin Hj. Abdul Majid, JP

The 2007 Asia Pacific Responsible Care Conference (APRCC 2007) will take place at the Crowne Plaza Mutiara Kuala Lumpur on November 12-13, 2007. This year's conference, with the theme "Responsible Care: A New Focus", aims to discuss the issues and challenges in Responsible Care implementation, its relevance to global chemicals management, and its role in the chemicals logistics and distribution field. The APRCC will also address the way ahead for the implementation of product stewardship in the chemical industry. The APRCC, which will be held back to back with the 35th ASEAN Chemical Industries Council (ACIC) Conference from November 13-14, 2007, is organized by the Chemical Industries Council of Malaysia (CICM).

Key Benefits of Attending

- Appreciating the importance and benefit of having an effective Responsible Care Programme.
- Learning from in-depth case studies on core new developments within Responsible Care Programme and apply new techniques to implement successful Responsible Care Programme.
- Keeping up to date with key principles necessary for successful Responsible Care Programme within your organisation.
- Applying good practices and innovative approaches in implementing Responsible Care Programme.

Who Should Attend

- OHS Officers, Chief Risk Officers, Project Directors, Project Engineers, Safety Officers/Managers, Factory Managers, Plant Managers.
- Occupational Physicians, OHS experts, Consultants, Practitioners, Inspectors, ESH Professionals, Health Officers, Suppliers of safety equipment, Safety and Health Trainers, Safety and Health Consultancy
- Oil & Gas
- Petrochemicals and Chemicals
- Energy and Utilities
- Manufacturing
- Transportation
- Engineering and Maintenance Associations
- Mining
- Steel
- Food Processing
- Government Bodies

In conjunction with

35th ASEAN Chemical Industries Council Conference

Featuring

RCLG 3rd Party Verification Workshop

Other Sponsors

“Responsible Care is a well organised, pro-active approach to managing health, safety and environmental aspect of our plants and business as that goes beyond legislative requirements.

Responsible Care is about Dialogue, Action, Performance of total life cycle of chemicals from initial research to final disposal.

It is a voluntary initiative that commits CICM members to continuous improvement in health, safety and environmental performance and encourages sensitivity and responsiveness to public concerns.”

CICM's Responsible Care Statement to RCLG, ICCA

CICM is the Malaysian steward for the Responsible Care initiative of the global chemical industry. CICM launched Responsible Care programme in 1994. CICM is the focal point for Responsible Care, an initiative of the chemical industry and adopted by chemical companies to improve continuously environmental, health and safety performance of their operations and products in manner responsible to the concerns of the public.
